

Re: The Sinclair network and this anti-Kerry film. They are calling it free speech. This is not free speech. They using the public airways to control the message and deliberately shut out any voices on the opposing side. That is not free speech, it is the opposite. Many ordinary citizens like myself are feeling frustrated and powerless as this network plans to control the message and serve its own interests and not the interests of the people. It is clear their interests are to swing the election to George W. Bush. This is the sort of thing that totalitarian states engage in order to impose their propaganda on the people. But this is not supposed to happen in a democracy. Please don't permit this to happen.  
Thank you.
